TASK 1:

The screenshot shows the 'Storage accounts' page in the Azure portal. At the top, there are tabs for '+ Create', 'Restore', 'Manage view', 'Refresh', 'Export to CSV', 'Open query', 'Assign tags', and 'Delete'. Below the tabs is a filter bar with a search box 'Filter for any field...' and three active filters: 'Subscription equals all', 'Resource group equals all', and 'Location equals all'. There is also an 'Add filter' button. The table below shows one record for a storage account. The columns are: Name, Type, Kind, Resource group, Location, and Subscription. The record shows a storage account named 'storageaccount2112241' of type 'Storage account', kind 'StorageV2', in the 'Storage_Account' resource group, located in 'East US', under the 'Azure subscription 1'.

Name ↑↓	Type ↑↓	Kind ↑↓	Resource group ↑↓	Location ↑↓	Subscription ↑↓
 storageaccount2112241	Storage account	StorageV2	Storage_Account	East US	Azure subscription 1
