Confirm password * ✓

Inbound port rules

Select which virtual machine network ports are accessible from the public internet. You can specify more limited or granular network access on the Networking tab.

Public inbound ports * ⓘ ☐ None
☒ Allow selected ports

Select inbound ports * HTTP (80), RDP (3389) ✓

 **This will allow all IP addresses to access your virtual machine.** This is only recommended for testing. Use the Advanced controls in the Networking tab to create rules to limit inbound traffic to known IP addresses.

Define network connectivity for your virtual machine by configuring network interface card (NIC) settings. You can control ports, inbound and outbound connectivity with security group rules, or place behind an existing load balancing solution.

[Learn more](#) 

Network interface

When creating a virtual machine, a network interface will be created for you.

Virtual network * 	<div>(new) myVM-vnet </div> Create new
Subnet * 	<div>(new) default (10.0.0.0/24) </div>
Public IP 	<div>(new) myVM-ip </div> Create new
NIC network security group 	<div><input type="radio"/> None</div> <div><input checked="" type="radio"/> Basic</div> <div><input type="radio"/> Advanced</div>
Public inbound ports * 	<div><input type="radio"/> None</div> <div><input checked="" type="radio"/> Allow selected ports</div>
Select inbound ports *	<div>HTTP (80), RDP (3389) </div> <div> This will allow all IP addresses to access your virtual machine. This is only recommended for testing. Use the Advanced controls in the Networking tab to create rules to limit inbound traffic to known IP addresses.</div>
Delete public IP and NIC when VM is deleted 	<input type="checkbox"/>
